

Just and Equitable Transition Away from Fossil Fuels

POLICY ASKS

1 Decisive Action Against Fossil Fuels

- We call for a global moratorium on all new exploration and development of new oil, gas, and coal reserves including an end to all fossil fuel subsidies.
- We call for the regulation of existing fossil fuel stockpiles and production thus ensuring 1.5°C climate goal alignment.
- We urge historical fossil fuel producers to acknowledge and address the harm that they have caused in the past, current, and anticipated Losses and Damages in line with the 'polluter-pays' principle.

2 Just, Inclusive, and Equitable Transition to Renewable Energy

- We call for the protection of ecosystems and human rights in the renewable energy transition.
- We strongly urge all development partners, multilateral development banks, and international financial institutions to allocate the necessary financial resources.
- We urge for immediate collective action and proactive implementation of the just transition.

3 Inclusive, Rights-Based Approach to Policy and Action

- We stress that all efforts must adhere to an intersectional rights-based approach, thereby ensuring the just phase-out of fossil fuels.
- We reject any false solutions and unnecessary language loopholes that divert from genuine climate action.
- We invite all stakeholders to welcome and endorse the 5th Pacific Regional Energy and Transport Ministers Meeting [E fate Outcome Document](#) and the preceding [Port Vila Call to Action for a Just Transition to a Fossil Fuel-Free Pacific](#).
- We call for the establishment of a Pacific Energy Commissioner for a Just Transition to a Fossil Fuel-Free Pacific.

4 Global Collaboration and Legal Measures

- We encourage all nations to strengthen the global fight against climate change by joining the Beyond Oil and Gas Alliance (BOGA), and endorsing the Fossil Fuel Non-Proliferation Treaty.
- Finally, we request all climate-vulnerable states to participate in the International Court of Justice advisory opinion on climate change proceedings.
